**Re: OGCA Ontario Builder Awards**  
**Sky Canoe Headquarters, Training Facility and NNLP Virtual Office Facility,**  
**Port Perry, Ontario**

As the Architects for the above-mentioned project, we at LGA Architectural Partners, are pleased to provide this letter of Commendation to Gillam Group for the OGCA Ontario Builder Award. We understand that the award goes to a team that was successful in delivering a demanding project while maintaining the high standards established by the client and design team at the outset of the project.

The Sky Canoe Headquarters, Training Facility and NNLP Virtual Office Facility houses a testing and training facility for Sky Canoe, who produces some of the world's most advanced autonomous, emissions reducing, long range cargo aircraft dedicated to creating connectivity, economic development, and a sustainable cargo solution for the low carbon economy. Having an existing relationship with LGA Architectural Partners, the Gillam team knew how to execute the client's vision and our design, while managing the schedule and overall project budget.

The Project team was comprised of consultants from around the province of Ontario. In our opinion, since this award is from the OGCA, highlighting Ontario Projects this project is a deserving winner for this classification.

Sincerely,  
Kevin Martin  
Senior Associate  
LGA Architectural Partners
